EDITORIAL

It's been ten years since BritPop first exploded on the charts. The legacy has left us great albums such as *Oasis's (What's The Story) Morning Glory* (recently voted the best album of all time, which is going over the top somewhat), *Radiohead's OK Computer*, *Blur's Parklife*, and *Pulp's Different Class*. However, the memories have been tainted by the consequences of BritPop: the *Spice Girls* and the karaoke-based concept of Pop Idol and The X Factor. BritPop was the biggest exportable British pop music style since the New Romantics, though making it in the States was a problem for all the acts, including *Oasis* who tried hardest of all across the Atlantic. Curiously, the Americans took to the *Spice Girls*.

The current round of new British musical talent very much has the same feel as BritPop did. This time around it looks as if Stateside success might come now that *Snow Patrol's Chasing Cars* has breached the Billboard Top 5. It's clear that today's acts are drawing on that BritPop legacy and the sound is very much guitar based. Ten years ago Noel Gallagher summed up *Oasis's* influences: "there wouldn't have been Oasis if it hadn't been for the Smiths; there wouldn't have been the Smiths if it hadn't been for the Buzzcocks; and there wouldn't have been the Buzzcocks if it hadn't been for the Beatles". The trail today would be different because the new movements are based in London and the South-East and would go something like: *Snow Patrol*, *Coldplay*, *Radiohead*, and *Pink Floyd*. In other words, today's music is intellectual rather than populist. Music of sixth-forms and colleges rather than football terraces.

I've talked about music revolutions and their periodicity before. I'm more interested now in why they go wrong. If we look at the exciting musical trends – Rock & Roll, Merseybeat, Glamrock, Punk, Scallydelic, BritPop – the most striking aspect is their brevity and frequent lack of commercial success. Apart from *Elvis* and *Bill Haley*, most of the Rock & Roll originators (*Chuck Berry*, *Little Richard*, *Fats Domino*, *Jerry Lee Lewis*) had few big hits. Amongst the Punk rockers, the *Stranglers* were probably most successful and had the longest career; the *Sex Pistols* burnt themselves out, the *Clash's* only top ten hit came after they split up, the *Damned* and *Buzzcocks* had fleeting moments of success. The same is true of Scallydelic. The unusual trends were Merseybeat and Glamrock where the perpetrators were hugely successful and the careers were extensive (and still going for some). If a trend sold poorly, then a record company is unlikely to promote it, preferring to sell to establish markets where they will be able to make a profit. Similarly, why should a radio station broadcast music of a style popular to only a minority? It's no wonder then that the Sixties were so great, because the new styles were popular and were heavily promoted.

So what about this new wave of BritPop? Is it doomed to crash and burn like Rock & Roll and Punk, or will it be the herald of a new Sixties? It's too early to say, of course. It takes a few years for a trend to get established globally, and if the American market isn't cracked, then record companies will lose interest. In the Sixties there were parallel trends in the States (Folk Rock and Soul, for example) which permitted extensive cross-fertilization of ideas. Are the *Killers* and the *Scissor Sisters* the start of something new Stateside? Let's hope so; the music scene has been pretty dull this millennium.

PREVIOUS BOOKLETS

Readers might like to know that this booklet is the latest in a series that began in 1983. From 1983 to 1995, the annual CHARTWATCH summary booklet was compiled by *David Longbottom* from the charts published in RECORD MIRROR and MUSIC WEEK. Up until early 1991, this means a Top 100 singles and album chart. The demise of RECORD MIRROR in 1991 meant that both charts were reduced to a Top 75. In 1996, *Tobias Zywietz* took over compilation of the booklet, and used the charts in HIT MUSIC which extended the MUSIC WEEK charts to a Top 200. All previous booklets, incl. the new version for 1995, are available from:

www.chartwatch.co.uk or: Chartwatch, 34 Brybank Road, Hanchett Village, Haverhill, Suffolk, CB9 7WD, UK

The booklets for 1985 to 1994 cost £2.00 each. Similar summaries have been produced for the years 1961, 1962, 1963, 1964, 1965, 1966 and 1967, but including only singles charts; these are £1.20 each. A summary booklet for the 1983 singles chart, but without chart runs, is available for £1.40, and a similar booklet for 1984, but including both singles and albums charts, costs £1.50. The booklets from 1995 onwards cost £2.50 each. Please use PayPal or send a cheque (in Pound Sterling) made payable to "Chartwatch" and crossed "a/c payee".

1 Introduction

This work is based on an analysis of the official British sales charts compiled by THE OFFICIAL UK CHARTS COMPANY (formerly CHART INFORMATION NETWORK), as published by trade paper MUSIC WEEK and independent chart newsletter CHARTS+PLUS. It covers 4,311 entries for the 2005 chart year: 2,032 singles, 336 downloads, 1,115 artist albums, 399 compilation albums, and 429 budget albums.

All charts are compiled by MILLWARD BROWN, Copyright © 2005 OCC LTD., London. Scoring system: ZSRPS₂₀₀₅

This analysis is Copyright © 2005–2006 T. Zywiez, Neulingen. The scoring system CWSRPS is Copyright © 1981–1996 Chartwatch, Ilminster. The scoring system ZSRPS₂₀₀₅ is Copyright © 1996–2006 T. Zywiez, Neulingen.

It should be noted that the point scores are not comparable across the charts, ie. a single with 500 points may have registered quite a different number of sales than an album or download with that same score. The scoring system was constructed primarily to make comparisons for the same chart between various years.

A diamond (◇) denotes a budget album, a club (♣) marks a compilation album, and downloads bear a heart (♥).

Date of Entry refers to the date when a record entered the charts for the first time, even when climbing from a position outside the scope of this work. For records entering *before* the start of the chart year, *Date of Entry* refers to the last time the record entered or re-entered the chart. An asterisk (*) denotes either an uninterrupted chart-run at the start and/or the end of the chart year, or (when positioned in front of the date) chart action prior to 2005.

A record's chart run is not broken, even when absent for more than four weeks. A separate run is only established when a record is re-issued with a *different* catalogue number and/or on a different label. Exceptions from this rule are made where appropriate.

Please note these rules of the *compressed* physical singles charts, the version published upto 16.04.2005:

3.1 Singles Chart: Positions 76–200

A single which, in the normal course of events, would appear between positions 76 and 200 of the combined Singles Chart is excluded if its sales have fallen for two or more consecutive weeks AND have fallen by more than 20% in the past week. Once excluded in this way, a record will only re-appear in the chart if its sales increase. Records excluded by this rule are shown on the printed chart report with their sales index and asterisks (***) in place of a chart position.

3.2 Sell Off Singles (effective from 20.10.2004)

If a single has previously achieved a top 40 position (and has spent at least one week outside the top 40) then subsequently achieves a week on week sales change of >5% stronger than that of the total singles market it will be assumed to be a 'sell off' title and 'starred out'—not achieving a chart position. Once 'starred out' by this rule, the product will not receive a chart position for the following 6 weeks. At its absolute discretion, OCC may choose to override this rule.

Once downloads became chart-eligible (first combined chart was dated 23.04.2005), these rules were replaced by a new rule that excludes a single 52 weeks after release.

Scope of the present work:

- *UK Singles Top 75+125*: 15.01.2005–16.04.2005
- *UK Combined Singles Top 250*: 23.04.2005–7.01.2006
- *UK Artist Albums Top 200*: 15.01.2005–7.01.2006
- *UK Compilation Albums Top 50*: 15.01.2005–7.01.2006
- *UK Budget Albums Top 50*: 15.01.2005–7.01.2006
- *UK Downloads Top 40*: 15.01.2005–7.01.2006

The first chart of the year 2005 is dated *15.01.2005* (compiled from sales data for 2.01.2005–8.01.2005 and published on 9.01.2005). The chart dated *8.01.2005* is based by some 90% on sales from 2004. The 2005 chart year has 52 weeks.

For some entries I list a sales figure. This data refers to the total number of units sold by record companies to retailers (*trade deliveries*)—not actual 'over the counter' sales to customers (*retail sales*). These trade delivery figures are certified (only on request of the record company) by the BPI – BRITISH PHONOGRAPHIC INDUSTRY LTD. to its members as follows:

	<i>for singles:</i>	<i>for albums:</i>
★ Platinum	600,000 units	300,000 units
● Gold	400,000 units	100,000 units
○ Silver	200,000 units	60,000 units

I have included all certifications awarded until the end of January 2006. Please note that my data is only complete for entries that either have (re)entered the Top 75 or were certified *since* 1994.

If you have any questions about this booklet or the UK charts, please e-mail me: zobbel@zobbel.de, or visit my website at <http://www.zobbel.de>. Charts+Plus is found at <http://www.chartsplus.co.uk> and Chartwatch at <http://www.chartwatch.co.uk>.
