EDITORIAL

For decades now, the record labels have had a major say in what their customers buy. By controlling what acts they sign, what songs those acts release and which tracks are made available to radio stations to play. Radio, too, has been a major player in what records make the charts. Back in the Sixties and Seventies there were even conspiracy theories that Big Business was controlling us by controlling what we listened to ...

The truth is that—right back to the 1920's—there have been alternatives. Initially it was independent record labels that were providing the music that the majors wouldn't record; whether it was Jazz and Blues recorded by the Okeh label, R&B and Rock'N'Roll recorded by Chess and Sun, Soul recorded by Tamla Motown, Atlantic and Stax, Island recording Reggae and Progressive Rock, Stiff and Rough Trade recording Punk and New Wave, right up to the plethora of indies that exist today. In the same way pirate radio provided an alternative to the BBC, often playing the Rock and Soul that the BBC had banned. More labels, more radio stations, and each one seeing its influence wane away as the years go by and the competitors increase.

Of course, the majors always respond. If the public wants to hear music that is not "mainstream" and wants to buy it from independent record labels, then provide that music on "fake" independents – subsidiaries set up by the majors posing as labels free of the major's influence. Hence labels such as Harvest (EMI) and Deram (Decca) appeared. Radio responded by employing the pirate DJ's.

Today there is a new phenomenon for the major to worry about: the Internet. Initially reluctant to provide official downloads, the industry had to rethink as sales of physical media plummeted. So we now have i-

Tunes and Napster—official download sites—and downloads now constitute the bulk of the singles chart. But you can't control the Internet because it is too big.

Chris Moyles attempted it soon after downloads were admitted to the charts and *Billie Piper's* HONEY TO THE BEE duly recharted on 27 Jan 2007, but only reached no.17. At the end of 2008, there was a FaceBook campaign to prevent *Alexandra Burke's* version of *Leonard Cohen's* HALLELUJA outselling the version by *Jeff Buckley*. It failed, but both tracks were big hits. In 2009, in another bid to prevent the X Factor from controlling what was no.1 at Christmas, another FaceBook campaign tried to persuade us to buy *Rage Against The Machine's* KILLING IN THE NAME OF instead of *Joe McElderry's* THE CLIMB (I had to look his name up, he left such an indelible blank on my consciousness) and it worked, but only for a week. Simon Cowell protested, ignoring the numerous times that because an X Factor contestant had sung a song on the show that the original had recharted; you can't have it both ways, Simon!

The latest phenomenon is to make all tracks on an album available to download. Lady GaGa's dominating position in the 2009 charts partly came about because of this. Lots of tracks from her first album charted, and then many were given "official" singles releases. This helped GaGa acquire more weeks on chart during a year than any other artist ever. This year (2010) saw the *Glee Cast* chart at least one new track a week. We also heard recently that many oldies have now sold a million because they are available as downloads. Essentially nearly every track ever recorded is available to download. How this will change the charts and how the record labels will respond will be an interesting story that will develop over the next decade. nr

PREVIOUS BOOKLETS

Readers might like to know that this booklet is the latest in a series that began in 1983. From 1983 to 1995, the annual CHARTWATCH summary booklet was compiled by *David Longbottom* from the charts published in RECORD MIRROR and MUSIC WEEK. Up until early 1991, this means a Top 100 singles and album chart. The demise of RECORD MIRROR in 1991 meant that both charts were reduced to a Top 75. In 1996, *Tobias Zywietz* took over compilation of the booklet, and used the charts in HIT MUSIC which extended the MUSIC WEEK charts to a Top 200. All previous booklets, incl. the new version for 1995, are available from:

www.chartwatch.co.uk or: Chartwatch, 34 Brybank Road, Hanchett Village, Haverhill, Suffolk, CB9 7WD, UK

The booklets for 1985 to 1994 cost £2.00 each, from 1995 onwards they cost £2.50 each. Similar summaries have been produced for the years 1961, 1962, 1963, 1964, 1965, 1966, and 1967, but including only singles charts; these are £1.20 each. A summary booklet for the 1983 singles chart, but without chart runs, is available for £1.40, and a similar booklet for 1984, but including both singles and albums charts, costs £1.50. Please use PayPal or send a cheque (in Pound Sterling) made payable to "Chartwatch" and crossed "a/c payee".

1 Introduction

This work is based on an analysis of the official British sales charts compiled by THE OFFICIAL UK CHARTS COMPANY (formerly CHART INFORMATION NETWORK), as published by trade paper MUSIC WEEK and independent chart newsletter CHARTS+PLUS. It covers all 26,500 chart positions for the 3,284 records and tracks to appear during the 2009 chart year: 1,309 singles, 1,120 artist albums, 362 compilation albums, and 493 budget albums.

All charts are compiled by MILLWARD BROWN for OCC, Copyright © 2009 OCC LTD., London. Scoring system: ZSRPS₂₀₀₇. This analysis is Copyright © 2009–2010 T. Zywiez, Neulingen. The scoring system CWSRPS is Copyright © 1981–1996 Chartwatch, Ilminster. The scoring system ZSRPS₂₀₀₇ is Copyright © 1996–2007 T. Zywiez, Neulingen.

It should be noted that the point scores are not comparable across the various charts, i.e. a single with 500 points may have registered quite a different number of actual sales than an album with a similar score. The scoring system is constructed primarily to make comparisons for the same chart between various years.

A diamond (◇) denotes a budget album, a club (♣) marks a compilation album.

Date of Entry refers to the date when a record entered the charts for the first time, even when climbing from a position outside the scope of this work. For records entering *before* the start of the chart year, *Date of Entry* refers to the last time the record entered or re-entered the chart. An asterisk (*) denotes either an uninterrupted chart-run at the start and/or the end of the chart year, or (when positioned in front of the date) chart action prior to 2008.

A record's chart run is not broken, even when absent for more than four weeks. A separate run is only established when a record is re-issued with a *different* catalogue number and/or on a different label, or when charting as a download that cannot be reasonably linked to a previous (physical) chart record. Exceptions

from this rule are made where appropriate.

Scope of the present work:

- *UK Combined Singles* Top 200: 10.01.2009–9.01.2010
- *UK Artist Albums* Top 200: 10.01.2009–9.01.2010
- *UK Compilation Albums* Top 50: 10.01.2009–9.01.2010
- *UK Budget Albums* Top 50: 10.01.2009–9.01.2010

The first chart of the year 2009 is dated *10.01.2009* (compiled from sales data for 28.12.2008–3.01.2009 and published on 4.01.2008). The chart dated *3.01.2009* is based 100% on sales from 2008. The 2009 chart year has 53 weeks.

For some entries I list a sales figure. This data refers to the total number of units sold by record companies to retailers (*trade deliveries*)—*not* actual 'over the counter' sales to customers (*retail sales*). These trade delivery figures are certified (only on request of the record company) by the BPI – BRITISH PHONOGRAPHIC INDUSTRY LTD. to its members as follows:

	<i>for singles:</i>	<i>for albums:</i>
★ Platinum	600,000 units	300,000 units
● Gold	400,000 units	100,000 units
○ Silver	200,000 units	60,000 units

I have included all certifications awarded until the end of January 2010. Please note that my data is only complete for entries that either have (re)entered the Top 75 or were certified *since* 1994.
